PROFILE

I have been a Frontend Developer and Multimedia Design student at KEA for the last year and a half. Where my passion for web development, animations and UI/UX design has increased.
Previously, I learned basic programing on my own and I fell in love with the subject, for that reason I decided to start with a formal education at KEA, changing in that way my career path.
I am really looking forward to expanding my abilities in these subjects and applying that knowledge.
